

Practice Question Numpy

Stats:-

1. Create a NumPy array of 10 numbers and find:

- mean
- sum

2. Given an array:

3. `arr = np.array([5, 10, 15, 20, 25])`

Find:

- minimum
- maximum

4. Find the **average** of all elements in a NumPy array.

5. Create a NumPy array and calculate:

- mean
- median

6. Find the **standard deviation** of an array.

7. Calculate the **variance** of a dataset.

9. Create a 2D NumPy array (3×4) and find:

- overall mean

10. Find **row-wise mean** of a 2D array.

11. Find **column-wise mean** of a 2D array.

12. Find:

- max value of each row
 - min value of each column
-
