

Matplotlib Scatter Plot Tasks

TASK 1

- Create **20 random numbers** for X and Y.
 - Draw a **red scatter plot**.
 - Set:
 - X label → "X Values"
 - Y label → "Y Values"
 - Title → "My First Scatter"
-

TASK 2

- Create **30 random values**.
 - Draw a scatter plot with:
 - color = green
 - size = 100
 - Show the plot.
-

TASK 3

- Create **two scatter plots** on the same graph:
 - First → red
 - Second → blue
- Use **same number of points**.
- Add a legend.

TASK 4

- Create a scatter plot using:
 - color = purple
 - size = 150
- Add:
 - X label
 - Y label
 - Title

TASK 5

- Generate **random ages and weights**.
- Plot them using scatter.
- Label:
 - X → Age
 - Y → Weight

TASK 6

- Create a scatter plot with:
 - color = orange
 - size = 80
 - alpha = 0.5
- Observe the transparency effect.

TASK 7

- Plot **50 random points**.
- Change:
 - color
 - marker size
- Display the graph.

TASK 8

- Create **two groups** of random points.
 - Plot both using scatter.
 - Add:
 - Title
 - Legend
-

TASK 9

- Create a scatter plot.
- Only change:
 - Title
 - X label
 - Y label
